A separate form is required for each outfall. Annual sampling requirements at each outfall: One sample from snowmelt discharge and three from rainfall storm events; one inspection per quarter (three-month period). Collect sample using a clean, clear container within 30 minutes of the beginning of a discharge (if not possible, describe why on an Exception Form and conduct a makeup inspection during the same quarter). Examine the outfall sample in a well-lit area and record the results for each site below. If there is no discharge at a particular outfall, then record "no discharge" on the form.
