Temporary Traffic Control

- Two-way traffic anticipated during project length
- Contractor to work on roadway using half-width construction (half of roadway open while work is completed on other side)
- Work to be broken down by segments. Each segment includes one intersection and extends to just short of the next intersection
- Both sides of segment will be constructed to bottom of pavement prior to moving on to next segment
- Work anticipated to begin at 1st Avenue and end at Skagway River Bridge
- Ore truck and tour bus traffic expected to be maintained on State Street and no signed detours are anticipated
- Temporary access to businesses will be accommodated during construction
- Temporary loss of driveway access and on-street parking is anticipated during construction of each segment

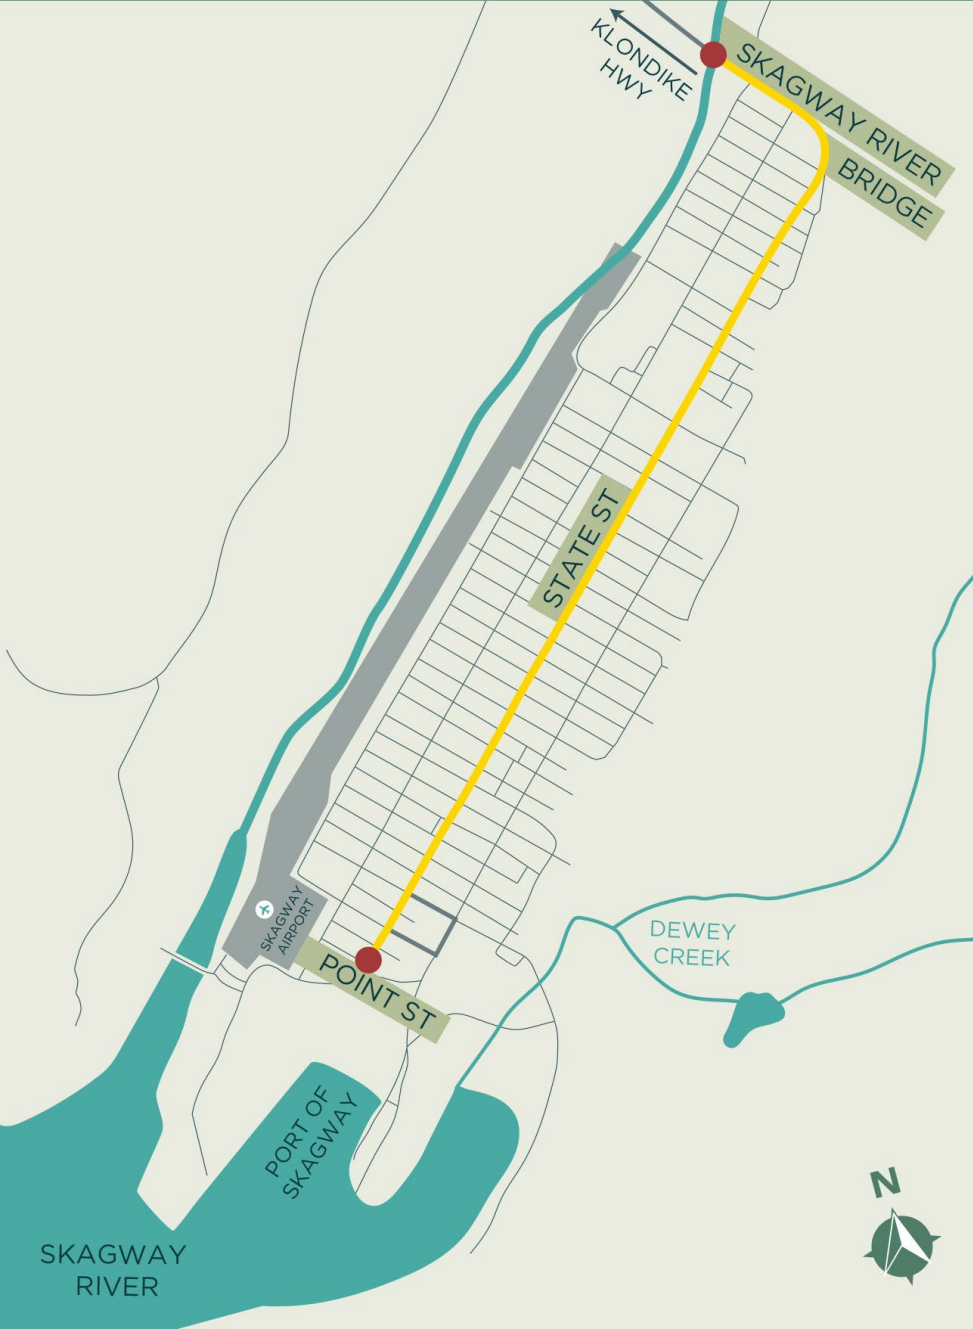

Right of Way (ROW) Acquisition

DOT&PF does everything it can to reduce the impacts of transportation improvements on private property.

Occasionally, additional rights are needed to build highways and sidewalks to current safety standards.

- Should it be necessary to impact your property in order to construct this project, you will be receiving an offer package via certified mail.
- After you receive your package, a Right-of Way Agent assigned to you will be contacting you.
- For ROW questions, contact Kelly Harp, DOT&PF Right-of-Way Properties Supervisor: kelly.harp@alaska.gov

Schedule

- Currently finalizing design plans (Plans, Specifications, and Estimates)
- Construction start: Spring 2022
- Construction completion: Summer/Fall 2023
